Census Data API Discovery Tool

MARCH 01, 2014

The Census Data API Discovery Tool provides a machine-readable dataset discovery service and is available in three formats:

• [api.census.gov/data.html](#)

• [api.census.gov/data.xml](#)

• [api.census.gov/data.json](#)

The content of [api.census.gov/data.json](#) is based largely on the Open Project Data Common Core Metadata Schema and is extended to include metadata specific to Census Bureau datasets. The [api.census.gov/data.xml](#) URI may be used to access the same information as XML.

American Community Survey: 5-Year Estimates: Detailed Tables 5-Year	The American Community Survey (ACS) is an ongoing survey that provides data every year -- giving communities the current information they need to plan investments and services. The ACS covers a broad range of topics about social, economic, demographic, and housing characteristics of the U.S. population. Summary files include the following geographies: nation, all states (including DC and Puerto Rico), all metropolitan areas, all congressional districts (116th Congress), all counties, all places, and all tracts and block groups. Summary files contain the most detailed cross-tabulations, many of which are published down to block groups. The data are population and housing counts. There are over 64,000 variables in this dataset.	2019	acs > acs5	Aggregate	geographies	variables	groups	sorts	examples	documentation

Accessing Data in Bulk

Benefits of the API

- Get the exact variables and geographies that you need
- Can easily update API calls to get data across years: Most variables are consistent from year to year
- The API has more historical data than data.census.gov

Limitations of the API

- Only one geographic summary level at a time
- Not all collections of geographies are available (e.g. all census tracts in the U.S.)

Other Ways to Get Data in Bulk

- data.census.gov
- FTP sites

Update the Year in Your API Call to Get Data Over Time

- Most variables are consistent from year to year. But, be sure to check for possible changes
