

Imagery User,

The Department of Finance and Administration, Strategic Technology Solutions, GIS Services (STS-GIS Services) is under contract with the Emergency Communications Board(ECB) to provide TN Emergency Communication Districts (ECD) with GIS data and ortho imagery to support public safety operations. In addition, STS GIS Services coordinates statewide geographic information systems (GIS) activities and works with State and local agencies on the development and dissemination of GIS data.

Included with this communication is access to a Vexcel Imagery product (Vexcel Imaging “Blue Sky” Web Service) funded by the ECB. The ortho imagery can be used in a wide range of GIS and/or digital mapping applications. Eligible entities include Local Governments, State Governments and the TVA.

Restrictions of use:

- Access Links cannot be shared outside your organization
- Links may be shared with employees of your educational organization
- Students are prohibited from receiving access links
- Imagery products will be used for internal business purposes only
- The sale of maps only showing Vexcel Imagery products is prohibited.
- Contractors may only use imagery products on projects for eligible entities
- Vexcel Imagery products may be used in web-applications using secure links. Specific secure links must be requested via [Access Request](#) or TNmap.GIS@tn.gov.

By opening the access links and using the digital ortho imagery, you agree to the use restrictions above and will limit distribution of the ortho imagery to your organizations internal use only. Any requests from other organizations wanting to acquire this digital ortho imagery should be directed to my office via [Access Request](#) or TNmap.GIS@tn.gov.

If you or any members of your organization have questions about the digital ortho imagery, please don't hesitate to contact us. We will be happy to assist in any way possible.

Regards,

Dennis T. Pedersen

Director STS-GIS Services
